

METHOD AND SYSTEM FOR TRANSFERRING DATA FILES

ABSTRACT OF THE DISCLOSURE

5 A method and a system for transferring a data file between a first and a second
computing device are provided. A wait time is calculated based on a transfer rate provided
by the first computing device. Thereafter, the second computing device transfers a first
portion of the data file to the first computing device. Next, the second computing device
waits for the wait time before transferring a second portion of the data file to the first
10 computing device.
